**TARIFF FORMAT**

- A.** Page Numbering - Page numbers appear in the upper right hand corner of the page. Pages are numbered sequentially. From time to time new pages may be added to the tariff. When a new page is added between existing pages, a decimal is added to the preceding page number. For example, a new page added between Pages 3 and 4 would be numbered 3.1.
- B.** Page Revision Numbers - Revision numbers also appear in the upper-right corner of the Page. These numbers are used to determine the most current page version on file with the Commission. For example, 4<sup>th</sup> Revised Page 4 cancels 3<sup>rd</sup> Revised Page 4.
- C.** Paragraph Numbering Sequence - There are various levels of paragraph coding. Each level of coding is subservient to its next higher level of coding. For example,  
2.  
2.1  
2.1.1  
2.1 I.A.  
2.1.1 .A.1.  
2.1.1 .A.1 .(a)
- D.** Check Sheet - When a tariff filing is made with the Commission, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the pages contained in the tariff, with a cross reference to the current revision number. When new sheets are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (\*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc., remains the same, just revised revision levels on some sheets). The tariff user should refer to the latest Check Sheet to find out if a particular page is the most current page on file with the Commission.

**SECTION 3 – CONNECTION CHARGES****3.6 Public Pay Telephone Surcharge**

In order to recover the Company's expenses to comply with the FCC's pay telephone compensation plan, effective October 7, 1997 (FCC 97-371), an undiscountable per call charge is applicable to all intrastate, interstate, and international calls that originate from any domestic pay telephone used to access Company services. This surcharge, which is in addition to standard tariffed usage charges and any applicable service charges and surcharges associated with service, applies for the use of the instrument used to access Company service and is unrelated to the Company service accessed from the pay telephone.

Pay telephones include coin-operated and coinless phones owned by local telephone companies, independent companies and other interexchange carriers. The Public Pay Telephone Surcharge applies to the initial completed call and any reoriginated call (i.e., using the # symbol).

Whenever possible, the Public Pay Telephone Surcharge will appear on the same invoice containing the usage charges for the surcharged call. In cases where proper pay telephone coding digits are not transmitted to the Company prior to completion of a call, the Public Pay Telephone Surcharge may be billed on a subsequent invoice after the Company has obtained information from a carrier that the originating station is an eligible pay telephone.

The Public Pay Telephone Surcharge does not apply to calls placed from pay telephones at which the Customer pays for service by inserting coins during the progress of the call.

**SECTION 4.0 - MISCELLANEOUS SERVICES AND CHARGES****4.4 IntraLATA and InterLATA Toll Presubscription**

- 4.4.1 IntraLATA Presubscription is a procedure whereby a Customer designates to the Company the IntraLATA or InterLATA Toll Provider (ITP), which the Customer wishes to be the carrier of choice for intraLATA and InterLATA toll calls. Such calls are automatically directed to the designated carrier without the need to use carrier access codes of additional dialing to direct the calls to the designated carrier. IntraLATA presubscription does not prevent a Customer, who has presubscribed to an intraLATA toll carrier, from using carrier access codes or additional dialing to direct calls to an alternative intraLATA toll carrier on a per call basis.

Each carrier will have one or more access codes assigned to it for various types of service. When an end user selects a carrier as its preferred intraLATA toll provider, only one access code of that carrier may be incorporated into the switching system of the Company permitting access to that carrier by the end user without dialing an access code. Should the same end user wish to use other services of the same carrier, it will be necessary for the end user to dial the necessary access code(s) to reach that carrier's other service(s).

An ITP must use Feature Group D (FGD) Switched Access Service to qualify as an intraLATA toll provider unless the Company has made with or prior arrangements. IntraLATA toll providers must submit an Access Service Request (ASR) prior to the intraLATA toll presubscription conversion date or prior to the date on which the carrier proposes to begin participating intraLATA toll presubscription, unless prior arrangements have been made with the Company.

Selection of an intraLATA toll provider by an end user is subject to the terms and conditions following.

- 4.4.2 At the option of the ITP, the nonrecurring charge for a change in intraLATA toll presubscription, as provided herein, may be billed to the ITP, instead of the end user. This may involve charges resulting from end-user initial free choice PIC changes.

This option for the ITP to be billed for the PIC change charge instead of the end user is not available for orders placed directly via the Company's Business Offices.

**SECTION 4.0 - MISCELLANEOUS SERVICES AND CHARGES****4.4 IntraLATA and InterLATA Toll Presubscription (continued)****4.4.3 Presubscription Charge Application**

- A. Existing end users may exercise an initial free presubscription choice, either by contacting the Company or by contacting the ITP directly. The initial free choice must be made within ninety (90) days following implementation of intraLATA toll presubscription. The charge for the initial free choice change will be billed to the new ITP at the discretion of the Company. End users' choices, which constitute exercising the free initial choice, are:
- Designating an ITP as their primary carrier thereby requiring no access code to access the ITP's service. Other carriers are accessed by dialing 10XXX, 101XXXX, or other required codes.
  - Choosing no carrier as a primary carrier thus requiring 10XXX or 101XXXX code dialing to access all ITP's. This choice can be made by directly contacting the Company.
- B. New end users who subscribe to service after the presubscription implementation date (including an existing Customer who orders an additional line) will be asked to select a primary ITP when they place an order for Company Exchange Service. IF a Customer cannot decide upon an intraLATA toll carrier at the time, the Company may extend a 30-day period following completion of the service request to make an intraLATA PIC choice without charge. In the interim, the Customer will be assigned a "No-PIC" and will have to dial an access code to make intraLATA toll calls.

Initial free selections available to new end users are:

- Designate an ITP as their primary carrier thereby requiring no access code to access that ITP's service. Other carriers are accessed by dialing 10XXX, 101XXXX, or other required codes.
- Choose no carrier as a primary carrier thus requiring 10XXX or 101XXXX code dialing to access all ITP's. This choice can be made by directly contacting the Company. In addition, new end users that do not select a preferred carrier will be assigned a "No-PIC".

Following a new end users' initial free selection, any subsequent selection made following implementation of intraLATA toll presubscription is subject to a nonrecurring charge as set forth herein.

**SECTION 4.0 - MISCELLANEOUS SERVICES AND CHARGES****4.4 IntraLATA and InterLATA Toll Presubscription (continued)****4.4.3 Presubscription Charge Application (continued)**

- C. If an ITP elects to discontinue Feature Group D service after implementation of the intraLATA toll presubscription option, the ITP is obligated to contact, in writing, all end users who have selected the canceling ITP as their preferred intraLATA toll provider. The ITP must inform the end users that it is canceling its Feature Group D service, request that the end user select a new ITP, and state that the canceling ITP will pay the PIC change charge as provided herein. The ITP must provide written notification to the Company that this activity has taken place.

Following the ITP's discontinuance of service, the Company will bill the canceling ITP the change charge for each end user that is currently designated to the ITP at the time of discontinuance.

- D. An unauthorized PIC change is a change in the presubscribed intraLATA toll provider that the end user denies authorizing. PIC disputes for end users are resolved through an investigative process.

If an unauthorized change in intraLATA presubscription occurs, the ITP making the unauthorized change will be assessed a charge for unauthorized change in presubscription as provided in 4.6.7 following. In addition, the ITP will be assessed the applicable charge for returning the end user to their preferred intraLATA toll provider.

If an unauthorized change in intraLATA toll presubscription and interLATA presubscription occurs at the same time, on the same Business/Residence line, and the presubscribed ITP is the same carrier for intraLATA and interLATA, presubscription change charges as provided herein and the Company's corresponding FCC Tariff apply. In addition, the ITP will be assessed the applicable charges for returning the end user to their preferred intraLATA toll provider as herein and the Company's corresponding FCC Tariff.

**4.4 IntraLATA and InterLATA Toll Presubscription (continued)**

**4.4.4 End User Charge Discrepancy**

A. When a discrepancy is determined regarding an end user's designation of a preferred intraLATA toll carrier, the following applies depending upon the situation described:

- A signed letter of authorization takes precedence over any order other than subsequent, direct customer contact with the Company.
- When two or more orders are received for an end user line generated by telemarketing, the date field on the mechanized record used to transmit PIC change information will be used as the PIC authorization date. The order with the latest application date/time determines Customer choice.
- If an end user denies requesting a change in intraLATA toll presubscription as submitted by an ITP, and the ITP is unable to produce a letter of authorization, signed by the end user, the ITP will be assessed all applicable change charges. The nonrecurring change charges are provided herein. The ITP will also be assessed the intraLATA toll presubscription change charge as specified herein, which was previously billed to the end user.

B. Verification of Orders for Telemarketing

Neither the ITP nor the Company shall submit a PIC change order generated by outbound telemarketing unless and until the order has first been confirmed in accordance with the FCC's current anti-slamming practices and procedures.

**SECTION 4.0 - MISCELLANEOUS SERVICES AND CHARGES****4.4 IntraLATA and InterLATA Toll Presubscription (continued)****4.4.5 PIC Switchback Option-Business/Residence**

PIC Switchback is an option under which no investigation activities are performed by the Company when an end user denies requesting a change in primary carrier submitted by the ITP. The ITP participating in PIC Switchback will be billed the PIC Switchback Charge, and the presubscription change charge, as specified herein, to switch the end user to the end user's previous carrier.

When the Company is contacted by an end user who denies requesting a change in ITP primary carrier, the end user will be credited the charge assessed for the disputed change in carrier, and will be switched back to the previous ITP at no charge. If this service is made available by the Company, ITP's may subscribe to or cancel PIC Switchback Service on 30 days notice to the Company by submitting a written request. A letter of authorization from the ITP will not be requested or accepted at a later date in the event of dispute of the charges assessed under the PIC Switchback option.

This option in no way relieves the ITP of the FCC requirements for:

- Verifying all PIC orders obtained by outbound telemarketing prior to submitting those orders, or
- Institute steps to obtain verification of orders submitted to the Company.

In addition, the end user has the option of initiating a complaint to the FCC or the Public Utility Commission concerning unauthorized changes in carrier.

**SECTION 4.0 - MISCELLANEOUS SERVICES AND CHARGES****4.7 Custom Calling Features**

The Company offers the following Custom Calling Features on a per use basis.

**4.7.1 Feature Descriptions**

Return Call: Allows a Customer to return the most recent incoming call and, after dialing a code, hear an announcement of the last telephone number that called. If the Customer wishes to return the call right away, voice prompts will instruct the Customer to dial a certain digit and the call will automatically be returned.

Call Trace: Allows a Customer to initiate an automatic trace of the last call received. After receiving the call, which is to be traced, the Customer dials a code and the traced telephone number is automatically sent to the Company. The Customer using Call Trace is required to contact the Company for further action. The Customer originating the trace will not receive the traced telephone number. The results of a trace will be furnished only to legally constituted authorities upon proper request by them.

Three Way Calling: Permits the end-user to add a third party to an established connection. When the third party answers, a two-way conversation can be held before adding the original party for a three-way conference. The end-user initiating the conference controls the call and may disconnect the third party to reestablish the original connection or establish a connection to a different third party. The feature may be used on both outgoing and incoming.

Repeat Dialing: Permits the Customer to redial automatically the last number dialed.

Per-Call Blocking: To activate per-call blocking, a Customer dials a special code prior to placing a call. Blocking will be activated for that outgoing call only. There is no charge for using per call blocking, and it is provided on an unlimited basis.

Call Blocking: Call Blocking allows Customer to block calls from different telephone numbers. A screening list is created by Customer either by adding the last number associated with the line (incoming or outgoing) or by pre-selecting the telephone number to be blocked. Callers from such numbers hear an announcement that the calling party is not accepting calls and Customer's phone will not ring. The screening list may be edited and revised at Customer's discretion. This feature may not be available with all services.

**SECTION 4.0 - MISCELLANEOUS SERVICES AND CHARGES****4.7 Custom Calling Features (continued)****4.7.1 Feature Descriptions (continued)**

VIP Alert: Allows a customer to program telephone numbers of selected callers, enabling the customer to distinguish certain incoming calls from all others by a distinctive ring tone. This feature may not be available with all services.

Hunting, per arrangement: A Hunting Service Arrangement is furnished using equipment located in the Company's central office arranged to select the next available line of a group of hunting lines, when the line associated with the called number in the hunting group is busy. All lines (includes PBX trunks) in a hunting group must originate from the same central office. A single hunting group may be shared by two or more customers provided all the customers' lines are technically capable of being in the same hunting group. Where two or more customers share the same hunting group, all lines in that hunting group must connect on the same premises.

Call Forwarding: permits the customer to automatically transfer all incoming calls to a telephone number at another local or toll location. The customer activates Call Forwarding by dialing a special code followed by the telephone number of the location to which calls are to be transferred. The service may be deactivated by dialing another code. The customer must activate and deactivate this service from the station forwarding the calls. The customer may still make outgoing calls while Call Forwarding is active, even while a transferred call is in progress. Calls cannot be answered at the base station while Call Forwarding is active.

Call Forwarding-Plus: combines Call Forwarding with remote access capability. In addition to the current Call Forwarding feature access method, Call Forwarding-Plus provides customers access from any touch-tone or tone-signaling-capable telephone. The customer will dial a number and then be guided by voice prompts to enter required information, including a Personal Identification number (PIN). Calls forwarded by this feature may be subject to local or toll charges as appropriate.

Call Hold: is an arrangement, which permits an established call to be placed on hold in order to continue a conversation from another extension on the line.

Call Waiting: permits the customer engaged in a call to receive a tone signal indicating a second call is waiting and by operation of the switchhook to place the first call on hold and answer the waiting call. The customer may alternate between the two calls by operation of the switchhook.

**SECTION 4.0 - MISCELLANEOUS SERVICES AND CHARGES****4.7 Custom Calling Features (continued)****4.7.1 Feature Descriptions (continued)**

Customized Ringing: service enables an individual line subscriber to have up to two telephone numbers assigned to one dial tone line in addition to the main number. Each number when dialed will result in a distinctive ring, which facilitates the ability of the customer to determine which number is being called. Where facilities permit, a distinctive Call Waiting tone for each telephone number will be provided for customers who subscribe to Customized Ringing Service and Call Waiting. Customized Ringing service is associated with incoming calls only and does not provide a separate dial tone line to place outgoing calls.

Speed Calling: is an arrangement, which provides for the calling of a telecommunications network number by dialing an abbreviated code. Two arrangements are available, an eight-code capacity and/or a twenty-code capacity.

Call Transfer: is an arrangement, which allows for the transfer of incoming calls to another line in the same residence or business.

Call ID and Call ID with Name: Service may be provided to residence, business and PBX customers (if the PBX equipment is compatible with Call ID). This feature allows a customer to see the telephone number of an incoming call displayed on the customer provided display unit. The telephone numbers that will be displayed on a Call ID subscriber's display unit include listed, non-listed and non-published numbers. Telephone numbers that will not be displayed are: (1) calls from customers who use Per-call Blocking or Line-Blocking (2) calls from customers located in central offices not a part of the SS7 Signaling System and; (3) calls placed through an operator. Call ID service also provides a residential customer with the ability to reject calls from customers who have blocked the display of their telephone number on outgoing calls. This feature is called Anonymous Call Rejection (ACR) and can be activated and deactivated by dialing a specific code. There is no additional charge for ACR service.

Call ID Per-Call Blocking: is automatically available to all customers served by the Company. This blocking option allows the calling party to block the passage of their telephone number and name on outgoing calls. To activate Per-Call Blocking a special code is dialed prior to placing each call. When this blocking feature is activated by the calling party, and they place a call to a Call ID subscriber, the subscriber's display unit will indicate that the incoming call has been blocked. There is no charge to activate Per-Call Blocking and the service is provided on an unlimited basis. Call ID Per-Call Blocking does not prevent the delivery of telephone number to 911 emergency service providers.

**SECTION 4.0 - MISCELLANEOUS SERVICES AND CHARGES****4.7 Custom Calling Features (continued)****4.7.1 Feature Descriptions (continued)**

Call ID Per-Line Blocking: The calling party may prevent the display of their telephone number and name on a permanent basis by subscribing to Per-Line Blocking. This blocking option automatically prevents the display of the calling number and name for all calls placed from that line to a Call ID subscriber, unless the feature is deactivated. This service is limited to residential customers. If a subscriber of Per-Line Blocking chooses to deactivate blocking, the calling telephone number and name would be sent for that call only.

After the call is completed, the line automatically reverts back to the Per-Line Blocking feature. The deactivation of Per-Line Blocking is completed by dialing a special code prior to placing each call. The code to deactivate Per-Line Blocking is different than the one used to activate Per-Call Blocking. Call ID Per-Line Blocking will be available where facilities permit. The Per-Line Blocking option can only be added or removed from a customer's line by placing a service order with the Company. When this service is removed the line is automatically converted to the Per-Call Blocking capability. Call ID Per-Line Blocking does not prevent the delivery of telephone numbers to 911 emergency service providers.

Customers who use either Per-Call Blocking or Per-Line Blocking will be unable to complete calls to Call ID subscribers that have activated the Anonymous Call Rejection (ACR) feature. When a caller who has blocked the display of his/her telephone number and name calls a Call ID subscriber who has activated ACR, the caller will hear an announcement that the called party does not take anonymous calls. To complete a call to a Call ID subscriber that has activated ACR: (1) place the call by unblocking the telephone number (2) place the call through an operator which may involve charges in addition to the cost of the call. The live operator surcharge will be waived for customers who are victims of domestic violence, the staffs of domestic violence program agencies and emergency services personnel. If the operator surcharge cannot be waived when the call is being placed, the Company will, upon notification, credit the live operator surcharge amount to the aforementioned party's telephone bill. Furthermore, should alternative methods become available in the future which permit the aforementioned to access the ACR party without revealing the caller's telephone number, the Company will waive any additional charges associated with such alternative methods.

**SECTION 4.0 - MISCELLANEOUS SERVICES AND CHARGES****4.7 Custom Calling Features (continued)****4.7.3 Caller ID Blocking**

A calling party may block the passage of his/her telephone number, associated main listed name and voiceback of calling identification information to users or subscribers to Optional Central Office Services, which utilize Signaling System 7 (SS7) technology. Blocking will also prevent call completion through the use of Return Call Service.

Customers have two blocking options as follows:

**A. Per-Call Blocking**

Per-Call Blocking will prevent the display of Customers' telephone numbers on outgoing calls. This feature may be utilized at any time through the activation of a special code prior to dialing an outgoing call.

Per-Call Blocking is provided at no charge, and is automatically placed on all telephone lines by the Company.

Per-Call Blocking will not prevent the display of telephone numbers to 911 emergency service providers.

**B. Per-Line Blocking**

Customers requesting Per-Line Blocking will prevent the display of their telephone numbers on all outgoing calls. The Per-Line Blocking feature may be deactivated at any time by Customers on a call-by-call basis through the activation of a special code. Blocking will be deactivated for that outgoing call only. Per-Line Blocking is provided free of any recurring charge, but is a special feature, which must be ordered by Customers.

The Company will initially install Per-Line Blocking at no charge. Requests to remove Per-Line Blocking on Customer lines will be completed at no charge. Subsequent requests to re-install Per-Line Blocking will be completed at prevailing Company nonrecurring service order rates.

Per-Line Blocking will not prevent the display of originating telephone numbers to 911 emergency service providers.

If a customer using blocking calls a Caller ID Number/Caller ID Name subscriber who has activated Anonymous Call Rejection, he/she will hear an announcement that the Caller ID Number/Caller ID Name subscriber is not accepting blocked calls. There are several ways to complete a call to a Caller ID Number/Caller ID Name subscriber who has activated Anonymous Call Rejection: (1) place the call through an operator; (2) place the call using a calling card; or (3) place the call without blocking. These services are provided either through a recorded announcement or by a special operator. The Company Representative negotiates the type of referrals offered to customers when they permanently disconnect, temporarily suspend or change their numbers, or are involved with a media error. These customers can choose between having their numbers referred and having a disconnect message provided to the calling party. Customers whose telephone services are permanently disconnected because of nonpayment are placed on Disconnect Announcement Service with a referral to another number.
